VANASHRI DESHPANDE

Java Backend Developer

Pune, India | +91 7795850462 | vnshri03@gmail.com

linkedin.com/in/vnshri | github.com/vnshri | vnshri.github.io/portfolio

PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience building secure, event-driven REST APIs and backend services with Java, Spring Boot, Spring Security, Hibernate/JPA and MySQL. Hands-on with JWT authentication, role-based access control, SQL query optimization and asynchronous messaging using Kafka and RabbitMQ. Experienced in debugging production issues and collaborating across teams to deliver reliable backend features. Available to join immediately.

Highlights: 20+ REST APIs built | Kafka & RabbitMQ messaging | JWT & RBAC security | Top 3% of engineering class

TECHNICAL SKILLS

Languages: Java (Core, Java 8), SQL, JavaScript, HTML, CSS

Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, JDBC, Servlets, JSP

Backend: REST APIs, Microservices, JWT Authentication, RBAC, Controller–Service–Repository Architecture, Java I/O (CSV, XML, JSON, Excel)

Database: MySQL, SQL Query Optimization, Indexing, Schema Design

Messaging: Apache Kafka, RabbitMQ

Tools: Git, Docker, Maven, Postman, IntelliJ IDEA

Testing: JUnit 5, Mockito, API Testing, Debugging

Practices: Object-Oriented Programming (OOP), Agile Development

PROFESSIONAL EXPERIENCE

Java Developer | Fourise Software Solutions Pvt. Ltd., Pune *Mar 2024 – Jul 2026*

- Designed and developed RESTful APIs with Spring Boot using Controller–Service–Repository architecture, supporting core application business workflows.
- Integrated Apache Kafka to enable asynchronous message processing between application components.
- Configured RabbitMQ queues, exchanges and bindings to decouple modules, with message routing and acknowledgment for reliable delivery.
- Built the data-access layer with Hibernate/JPA, including entity mappings, repository operations and MySQL integration.
- Wrote complex SQL queries and optimized schemas, tables and indexes to improve query performance and data consistency.
- Implemented request validation and centralized exception handling, improving API reliability and returning consistent error responses.
- Wrote unit tests using JUnit 5 and Mockito to verify backend components and API behavior.
- Diagnosed application issues through log analysis and root-cause tracing, and delivered fixes in collaboration with the team.
- Processed text, CSV, XML, JSON and Excel files using Java I/O streams and supporting libraries.
- Contributed responsive UI components and integrated them with backend services.

PROJECTS

Complaint Management System | Spring Boot, Microservices, Spring Security, MySQL vnshri.github.io/cms-app

- Built 20+ REST APIs supporting authentication, role-based access control (RBAC), password reset, CRUD operations, status tracking and input validation.

Payment Integration System (PayLink) | Spring Boot, Microservices, MySQL vnshri.github.io/paylink-app

- Developed REST APIs for payment-link and transaction management, including authentication, role-based access and filtering by date and amount.

Shipping Agency Website | HTML, CSS, JavaScript (Frontend) vnshri.github.io/shipping-agency-site

- Designed a responsive multi-page website (Home, About, Services, Blog, Contact) for a shipping and storage agency, with a login/sign-up section and service showcase; deployed on GitHub Pages.

EDUCATION & CERTIFICATIONS

B.E., Electronics & Communication | VSM's SRK Institute of Technology (VTU) | CGPA: 8.0/10 *2018 – 2022*

Academic Achievement: Ranked in the top 3% of the engineering class

Certifications: Java Full Stack Development; Web Development Internship
